

PU-TEC *belt coating*

PU-TEC - top performing endurance!

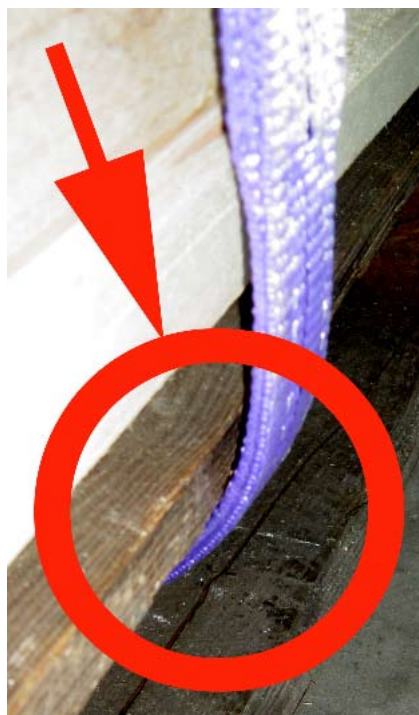

Common lifting belts often are under a damaging impact of abrasive surfaces of the goods that shall be lifted. This results in an early dead of such belts.

VTT PU-TEC is a new method to protect the slings against these bad impacts thanks of a smooth PU coating on one or both sides of the slings. The sling is well protected, while their soft handling is still guaranteed. This is a real advantage to a competitive price! The belts can be used on construction sites as well as in the heavy industry!

benchmark test	
	<p>A. Common Lifting Belt</p> <p>The belt looks very dirty and is already damaged after 200 slidings over a concrete edge.</p>
	<p>A. PU-TEC Lifting Belt</p> <p>The belt is still in a very good condition. No dirt or damages after 200 slidings over a concrete edge.</p>

technical data							
WLL available	capacity / WLL						
	1 to	2 to	3 to	4 to	5 to	6 to	8 to
lengths available	1-6m	1-6m	2-6m	2-6m	2-6m	2-6m	2-6m
color of belt	violet	green	yellow	grey	red	brown	blue
